

KARTAD, TURKEY'S HIGHER TAHIN AND HALVA

Established in 1920, Kartaş Karamanlar Gıda Sanayi Ve Ticaret A.Ş is proud of carrying traditional Turkish flavors to your tables with 3 Generations of Experience. Kartaş, which was established in Uşak and carried out the first tahini production in Turkey with horse-mounted stone mills, came to the Uşak region in the 1930s with electricity. It has increased its production to a great extent by moving to its facilities working with electric power. In this way, Kartaş has provided tahini supply to many halva producers in Turkey for many years. It became institutionalized in 1990 and created the KARTAD brand in 1992.

In the same year, the Fresh Grape Molasses Facility, the production of which was started for the first time in Turkey with the Vacuum System, was put into operation. The company is still operating with Tahini, Fresh Organic Grape Molasses, Foam Halva, Halva Varieties, Poppy Paste, Sesame Paste, Jam, Crispy Halva, Bagel and Pidelik Sesame, Uşak. It carries out the production of tarhana and many local products and takes its place on the table with the brand of Kartad.

Our New Product TAHİNELLA (Cream Tahini Halva) has been presented to the taste of the consumers by increasing the product range with traditional features within the scope of the works in 2007. All the products offered to the consumers are combined with the latest technology in production, hygiene, quality and experience, and are controlled at every stage of production within the scope of ISO 9001-ISO 22000 Quality Certificates. We aim to create innovations by constantly competing with ourselves, with the confidence we have gained in the sector since 1920, without Compromising on Quality. We produce in order to carry the beauties that came to life in these lands to the future, to add brand new flavors to our traditional tastes. We protect our cultural accumulation of thousands of years with geographical indication. 3rd Generation Representative Kamil KARAMAN has great advantages in terms of brand value of products with geographical indications, increasing the demand for the products by directing the consumer's preferences. It gives an identity to the product by making it distinguishable. We are proud of producing and presenting the products with geographical indications under the Kartad brand, with the support of our UŞAK CHAMBER OF COMMERCE AND INDUSTRY.
